

The Technical Resume Guide

Explore our tips and tricks for building
an effective tech resume

Your resume matters.

Why?

At Vetterly, our goal is to connect job seekers with their dream company. How does the interview process start? With a phone screen. Who do recruiters reach out to? Top candidates! What defines a top candidate? An impressive background and a strong skill set. How can you best display your experience and skill set?

A top-level resume!

What's included?

1. Resume Template & Guide

We'll show you how to format your resume and we'll explain what to include and why.

2. Checklist & Action Verbs

Follow these steps before submitting your resume and use our list of action verbs as inspiration in your "Experience" section.

3. Sample Resume

We filled out our resume template so you can have a real example!

Resume Template & Guide

We broke our resume template into five sections: Header, Skills, Experience, Education, and Interests. Follow our guide when formatting your resume.

First, Last Name

City, State | Telephone | Email | LinkedIn | Github

Role Preference(s)

SKILLS

In order of proficiency: Skill 1, Skill 2, Skill 3, Skill 4, etc.

PROFESSIONAL EXPERIENCE

Company Name

Start Date – End Date

Title

- Responsibilities
- Skills
- Deliverables

Company Name

Start Date – End Date

Title

- Responsibilities
- Skills
- Deliverables

Company Name

Start Date – End Date

Title

- Responsibilities
- Skills
- Deliverables

EDUCATION

Degree

Graduation Year

School

INTERESTS

Section One: Header

First, Last Name

City, State | Telephone | Email | LinkedIn | Github

Role Preference(s)

Always include your location in city and state form - full address is not necessary. Next, be reachable! Include your phone number and email address. Lastly, include any relevant links to share your work.

If you have a specific role in mind, such as "Full Stack Engineer" or "Engineering Manager", you can include your title. If you're open to multiple role types, skip this part!

Section Two: Skills

SKILLS

In order of proficiency: Skill 1, Skill 2, Skill 3, Skill 4, etc.

List your top skills in order of expertise, frequency, and relevancy. This means you should include skills you used in your most recent work experience and your top skills should be listed first.

Limit to top 5 – 10 skills.

Section Three: Experience

PROFESSIONAL EXPERIENCE

Company Name

Title

- Responsibilities
- Skills
- Deliverables

Show accurate dates in month/year form and keep the formatting consistent. For example: "10/2017 – 12/2019". Also, start with your most recent job and work backwards.

Start Date – End Date

Company Name

Title

- Responsibilities
- Skills
- Deliverables

What did you work on? What problems did you solve? What role did you take on within the team?

Start Date – End Date

Company Name

Title

- Responsibilities
- Skills
- Deliverables

How did you use your skills in this role?

What impact did you make in your role? Quantify if possible.

Start Date – End Date

If you have been promoted, make sure to show your tenure in dates. Companies like to see career progression.

Section Four: Education

EDUCATION

Degree
School

Graduation Year

If there is a certification you are working on, add expected completion date. For example: "Anticipated June 2020"

If you had a non-traditional degree, add any recent boot camps/certifications. Any projects done during boot camps can be added in the "**Professional Experience**" section (just be sure to explain scope, skills, and deliverables).

Make sure the formatting matches the rest of your dates!

Section Five: Interests

INTERESTS

Interests/Personal Projects is an optional section to include. It can be used to show what you do in your free time – such as hobbies and personal projects. It's a great way to show your personality and create conversation points.

MISCELLANEOUS

Junior job seekers: Recent graduates can move the education section to the top, between Skills and Professional Experience. Include your GPA if you feel proud showcasing it, otherwise, exclude it.

Senior job seekers: Focus on your most recent roles – the bulk of your description should be reflected in your most recent work. If you have multiple previous roles you want to include, give a brief summary for each. If you can't keep your resume to one page, try not to exceed two!

Checklist

The Do's (and Don'ts!) of creating your resume
– from the planning to the saving stage.

& Action Verbs

Our top ten Coding and Managerial action verbs – include these in your "Professional Experience" section of your resume.

Checklist

Make your resume as concise as possible. One page is ideal, two at most.

Enter your contact information at the top of the page.

Include professional experience that is relevant to the jobs you are applying to.

Be succinct when explaining your work history.

Start your sentences with action verbs (see list on next page).

When describing your experience, don't forget to include your interactions with team members.

Be prepared to explain any resume gaps you might have during an interview.

Show company acquisition (if applicable) so your resume doesn't look jumpy. For example: "Company.io (previously Business.io)"

Proofread for consistent formatting and verb tense (for your current job, use present tense and anything else, use past tense).

Download your resume in PDF form before sharing with others.

Action Verbs

Coding Related Verbs

<i>Automated</i>	<i>Engineered</i>
<i>Built</i>	<i>Implemented</i>
<i>Collaborated</i>	<i>Integrated</i>
<i>Created</i>	<i>Launched</i>
<i>Developed</i>	<i>Maintained</i>

Managerial Related Verbs

<i>Advocated</i>	<i>Lead</i>
<i>Coached</i>	<i>Managed</i>
<i>Delegated</i>	<i>Mentored</i>
<i>Facilitated</i>	<i>Taught</i>
<i>Influenced</i>	<i>Trained</i>

Sample Resume

Our resume template filled out with examples for each section. Use this as inspiration when completing your own resume.

Nathan McSample

Brooklyn, NY | (123) 456-7890 | mcsample@gmail.com | LinkedIn | Github
